

## ***CASE STUDY – Disaster recovery at Rug and Furniture Store***

**Issue:** Following a fire there was fire, smoke, soot and water damage in varying degrees throughout the 6,000 sqm store.

**Solution:** Within 12 hours, Odorox® MVP generators were dispatched and installed. All physical repairs were performed while the MVPs generators deodourized the air and the smoke affected contents.

**Outcome:** The store salvaged 10,000+ rugs that might have needed to be discarded or individually cleaned and was allowed to re-open in 3 days, at least one week earlier than originally anticipated.
