

Spruce Meadows – Case study Information

Spruce Meadows – Calgary, Alberta

Corporate Description: World renowned equine show jumping facility

Challenge: Odor – Proximity to inhabited spaces

Odor Source: Stabled animals (Horses & Cattle)

Odorox® Treatment Area: The Equiplex Equestrian Centre is a 36,000sq.ft. versatile complex which can be transformed from an internationally acclaimed show jumping tournament to a stable then to an open area that hosts trade shows, corporate functions, weddings and galas.

Odorox® Units Deployed: 4 X HAC 06

Demonstrated Results: “ ... we not only resolved our challenge of odors in the venue, the “Odorox® Air Curtain” units assisted us in being able to changeover the venue quickly from such odor causing events (i.e. cattle shows) to corporate functions and formal sit down dinners. Odorox® has created a fresher air experience indoors for the horses and the many guests who visit Spruce Meadows. The Odorox® technology has performed as presented and I wish them well in the future, which is certain to be a successful one”. – Linda Southern Heathcott, President, Spruce Meadows
